SUMMARY

Software Engineer with 2.5+ years of experience shipping production web and mobile products with **Flutter, Next.js, TypeScript and Node.js**. I build both the client and the API, with role-based access, JWT sessions, realtime (Socket.IO), payments and cloud deployment. Shipped Briktra, a multi-tenant construction app live on the Google Play Store, plus a salon CRM with its own API and an athlete-coach-academy platform.

SKILLS

Mobile:	Flutter, Provider, Firebase FCM
Frontend:	Next.js, React.js, TypeScript, JavaScript (ES6+), Redux Toolkit, Tailwind CSS, HTML5/CSS3
Backend:	Node.js, Express.js, REST APIs, JWT, Socket.IO, Zod, bcrypt
Databases & ORMs:	PostgreSQL, MySQL, MongoDB, Prisma, Sequelize
Cloud & Tools:	AWS S3, CodeBuild, Git/GitHub, CI/CD
Integrations:	Stripe, Cashfree
Testing:	Jest, Supertest, React Testing Library, Flutter Test

PROFESSIONAL EXPERIENCE

Software Engineer — Edgezen Labs (Briktra: multi-tenant construction platform)	Sep 2025 – Present
Briktra is live on the Google Play Store. Shipped the multi-tenant construction app (Android, iOS, web) end to end. - Own the Flutter app architecture: Provider state per domain and named routes so FCM notifications open the right screen. - Built secure auth with JWT in flutter_secure_storage: password, OTP and biometric login, with automatic session expiry. - Implemented 5 user roles plus subscription-plan limits that control which routes and actions each user sees. - Built GPS attendance validation (Haversine vs. site location, timeout fallback) and signed-URL file access. - Integrated Cashfree payments to sync plan state after checkout; responsive layout and English/Tamil/Hindi localization. - Stabilized Android builds by fixing runtime crashes and improving API error handling.	
Full-Stack Developer — Yarkria Tech (Freelance; Cleomitra salon CRM)	Feb2025–Apr 2025
- Built the Flutter app (Android, iOS, web) and an Express + TypeScript API for branches, customers, invoices and chat. - Built OTP and Facebook OAuth login; secured the API with token middleware, bcrypt, Helmet and rate limiting. - Added real-time chat (Socket.IO) and media uploads to AWS S3 via presigned URLs; Sequelize + MySQL migrations. - Wrote Jest and Supertest tests for core request paths; deployed with CodeBuild and Elastic Beanstalk, Winston logging.	
Full-Stack Developer — Akkenna Animation and Technologies (Engage Athlete)	Sep2023– Dec 2024
- Built a Next.js + TypeScript product with separate athlete, coach and academy areas, plus a React admin panel. - Implemented role-based route protection with NextAuth; managed state with Redux Toolkit, forms with Formik and Yup. - Integrated Stripe and Square for checkout and subscriptions, and a Socket.IO client for messaging. - Built admin analytics with Chart.js and FullCalendar; added Jest tests for the panel.	

PROJECTS

WorkFlow AI — Project Management Workspace with AI Insights	Next.js, Express, PostgreSQL, Prisma, Socket.IO, Gemini
- Multi-role workspace for projects, tasks and private documents, with HTTP-only JWT cookies and per-project access control. - AI assistant explains only API-computed metrics, keeping answers grounded in real task data; pgvector document search. - Socket.IO rooms authorized per organization and project, plus an organization-scoped activity feed.	
AI Blog Writing Platform	Next.js, Node.js, Express, MongoDB
Next.js editor on an Express API; AI generation sits behind one server boundary and returns structured content.	

EDUCATION

B.Tech, Information Technology — Velalar College of Engineering and Technology	84%	2019 – 2023
Higher Secondary School — Vijay Vikas Matriculation School	68.17%	2018 – 2019
SSLC — Vijay Vikas Matriculation School	96%	2016 – 2017
